---

A self taught frontend developer, with a passion for applying my skills and knowledge to real-world projects and contributing to a dynamic and collaborative team. With about a year hands-on experience,

I aim to create visually appealing, engaging, and user-friendly web applications that provide excellent user experience and drive innovative solutions while looking for ways to develop myself as a developer.

## TECHNICAL SKILLS

---

- Languages/tools: HTML5, CSS3, Javascript.
- Frameworks and Libraries: ReactJS, Tailwind CSS, and Bootstrap.

## PROJECTS

---

- **Weather Check -**

Built a simple web app for checking weather condition of a place. Built with HTML, CSS, and JavaScript. While fetching data from Openweathermap.

- **ToDo-App**

Built a web app for itinerating daily tasks and schedules on the go. Built with React JS, Tailwind CSS.

- **Quiz**

Built a fun-based browser trivia game, with easy, and cool facts built with HTML, CSS, and JavaScript

## OTHER SKILLS

---

- Excellent oral and written communication skills.
- An excellent disposition towards learning and collaborating with teams.
